

PFD Launches North American Presence

DynoChem Inc. established to support growing US market

DUBLIN, Ireland – December 6th 2005 – Performance Fluid Dynamics (PFD) Limited today announced that it has established DynoChem Inc., a US-based subsidiary aimed at supporting its growing number of strategic customers in North America.

DynoChem Inc. (Wilmington, DE) will be building on business relationships developed over the last five years with leading US pharmaceutical and speciality chemicals companies. Following growth of over 600% in the last year, a US presence had become a necessity in providing rollout support and closer communication between DynoChem users and developers.

About PFD

PFD provides industry-leading software for simulating, characterizing and scaling unit operations in the batch industries. Our development and support teams include chemists and engineers experienced in chemical development and scale-up in the pharmaceutical, fine chemicals and speciality chemicals industries. Our support service allows users to benefit from experience of hundreds of reaction steps and the associated work-up and isolation operations. Our technology is used by 9 of the top 10 pharmaceutical companies to help accelerate process development, improve process efficiency and to reduce the cost of goods at launch and beyond.
