

GlaxoSmithKline (GSK) to deploy DynoChem globally

DUBLIN, Ireland – April 12, 2005 – Performance Fluid Dynamics (PFD) Limited has entered into a long-term licensing, support and training agreement with GlaxoSmithKline (GSK) to provide its DynoChem software to GSK's Global R&D and Manufacturing Services facilities for chemical engineering and scale-up modelling.

Building on an excellent working relationship since 1999, this agreement enables GSK to embed DynoChem into a widespread and stable business process for development and transfer of new synthesis reactions and their associated workup and isolation operations.
