

Scale-up Systems Opens Indian Office

Developers of DynoChem® Aim to Accelerate Process Development in Indian Pharmaceutical Industry

DUBLIN, Ireland – 31st August 2011 – Scale-up Systems Limited, the leading provider of process development software to the pharmaceutical industry, today announced it has established Scale-up Systems India Pvt. Ltd., a Mumbai-based subsidiary that will support its growing number of customers in India.

Scale-up Systems India Pvt. Ltd. will be building on business relationships developed over the past three years with leading Indian pharmaceutical and speciality chemicals companies. Following the success of the first [Indian DynoChem User Meeting](#) in April 2011, a dedicated local presence has become necessary to provide rollout support and closer communication with Indian managers and users.

An initial team in the Mumbai office will be led by Mr. Mahendra Pandit on the Business side and Dr. Sanket Salgaonkar for Training & Technical Support.

Scale-up Systems India's Managing Director Dr. Steve Hearn said "For us, the Indian market represents an exciting combination of increased investment and presence from Big Pharma, growing indigenous companies that are hungry to succeed and Universities that are producing extremely capable young chemists and engineers. These factors bode well for those companies whose management embrace the reality that strong process understanding is critical to meet today's regulatory and business requirements."

About DynoChem

DynoChem® is the world's most widely used process design, development and scale-up software for scientists and engineers working in the pharmaceutical industry.
